

INTEGRATED
SERVICES FOR

CONFERENCES

EXHIBITIONS

CULTURAL EVENTS

We specialize in creating physical and digital displays, with a unique approach that places content enhancement at the center.

We are committed to transforming your ideas into engaging realities, using recycled and recyclable materials to reduce environmental impact.

Our strength lies in fabrication 4.0 tooling: using precision 3D printers and advanced laser cutting machines, we transform complex concepts into breathtaking physical and digital structures.

Every project we create is the result of a compelling creative process, combining aesthetics and cutting-edge technology.

By choosing our services, you are choosing not only innovative design, but also a tangible commitment to the environment and technological advancement.

projects implemented

100%
happy customers

Brand Identity

We design and implement the visual identity of your event, with logo and corporate image study to build the materials with which to communicate the event.

Web Platforms

We build web platforms for all-around management of your event, with registration forms, management, registration forms, content upload forms.

Media & Communication

We design Communication Plans for the dissemination of your event or project on all channels (online and offline), with graphic and media content creation.

Exhibition Design

We plan the content and design of your exhibit using recycled and/or recyclable materials, with the use of 4.0 instrumentation (3D printing, lase cutter, etc.).

Technical assistance for events

We assist you with specialized staff in the technical management of your event (directing, video shooting, web sharing, blended events).

Organizational secretariat

We manage the organizing secretariat both at the initial stage (participant registration, communication with partners and sponsors) and during the event.
